NOTES TO THE FINANCIAL STATEMENTS

1. General information

Naoussa Spinning Mills AE (the Company) and its subsidiaries (together the Group) are engaged in the Textile Industry sector.

The Group has manufacturing plants in the region of Macedonia (Imathia, Pella, Thessaloniki), in Thrace (Industrial Zone of Komotini, Palagia Alexandroupolis), in Viotia (Inofita, Avlida) and the Balkan countries (Albania, FYROM, Bulgaria).

Naoussa Spinning Mills AE is a limited liability company and has its primary listing on the Athens Stock Exchange. The address of its registered office is in Peristeri, Kifissou & 1 Konstantinoupoleos Str. and its web site address is www.klonatex.com. These interim financial statements at 30 September 2005, have been approved for issue by the Board of Directors on 25 November 2005.

2. Summary of significant accounting policies

2.1 Basis of preparation

The consolidated financial statements of the Group and the financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (IFRS) for the first time from 1/1/2005. The relative disclosures required by the IFRS 1, are disclosed in Note 36.

These financial statements have been prepared under the historical cost convention, except for the property, plant and equipment that have been adjusted and the financial instruments that have been revalued at fair value. The principal accounting policies are described below.

The preparation of the financial statements in conformity with IFRS requires the use of certain critical accounting estimates and the exercise of judgement in the process of applying the accounting policies.

2.2 Consolidation

Subsidiaries

The consolidated financial statements incorporate the financial statements of the company and the companies controlled by it as at 30 September 2005. In particular are included the financial statements of RODOPI SPINNING MILLS AE and the consolidated financial statements of the company FANCO AE, which consolidates the companies GALLOP AE, ELIX AE, BULFANCO A.D., TEXTILKO E.O.O.D., ALFAN AE and KAVASKO LTD.

Control is achieved over which the Company has the power to govern the financial and operating policies of another entity with the intention of gain from its activities.

On acquisition, the assets, liabilities and contingent liabilities of a subsidiary are measured at fair value at the date of acquisition.

Any excess of the cost of acquisition over the fair value of the identifiable net assets acquired is recorded as goodwill.

In the cost of acquisition is less than the fair value of the net assets of the subsidiary required, the recognised directly in the income statement in the period of acquisition.

The minority interests are recognised, per proportion, on fair value.

In the following periods, any losses are allocated to minority, per proportion, in addition to minority interests.

The results of subsidiaries acquired or disposed of during the year are included in the consolidated income statement from the effective date of acquisition or up to the effective date of disposal, as appropriate.

The financial statements of the subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Inter-company transactions, balances, income and expenses and results are eliminated at consolidation.

Investments in associates

Associates are entities over which the Group has significant influence but not control or by joint control. Significant influence is exercised through participation in the financial and operating policy decisions of the investee.

The results and the assets and liabilities of an associate, are incorporated in the financial statements by the equity method, besides the case they are classified as available for sale (see below).

Investments in associates are disclosed in the Balance Sheet at cost, adjusted against the post-acquisition movements of the Group's share at the net assets of the associate and taking into consideration any impairments of the value of separate investments. The Group's right of the share of associates losses, are not recognised. Any excess of the cost of acquisition over the Group's share of the fair values of the acquired assets (assets-liabilities-contingent liabilities), of the associate at the date of acquisition is included in the account "Investments in associates".

If the cost of acquisition is less than the fair value this difference is recognised in the income statement at the date of acquisition.

Where the Group transacts with an associate, profits and losses are eliminated to the extent of the Group's interest in the relevant associate. Losses may provide evidence of an impairment of the asset transferred, in which case appropriate provision is made for impairment.

2.3 Non-current assets held for sale

Non-current assets held-for-sale are stated at the lower of carrying amount and fair value less the cost required for the sale. Non-current assets are classified as assets held for sale provided they are a discontinued operation or are available for direct sale and for which management has started the process of their sale.

2.4 Segment reporting

A business segment is a group of assets and operations engaged in providing products or services that are subject to risks and returns that are different from those of other business segments. In our circumstance all products and services are included in the textile sector. A geographical segment is engaged in providing products or services within a particular economic environment that are subject to risks and returns that are different from those of segments operating in other economic environments.

2.5 Foreign currency translation

(a) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The consolidated financial statements are presented in euros, which is the Company's functional and presentation currency.

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions.

Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement.

(c) Group companies

The results and financial position of all group entities that have functional currency different from the presentation currency are translated into the presentation currency as follows:

- a) Monetary assets and liabilities are translated into Euro at the closing rate at the balance sheet date.
- b) Non-monetary assets and liabilities are translated at historical exchange rates.
- c) Equity is translated at the exchange rates ruling at the date they incurred.
- d) Income and expenses are translated at average exchange rates of the period except if the exchange rates have a significant fluctuation.

The arising exchange differences are recognised in reserves of shareholders' equity and carried to the income statement when a foreign operation is sold.

2.6 Property, plant and equipment

Property, plant and equipment, except productive property, are shown at cost less accumulative depreciation and impairment losses. Cost includes expenditure that is directly attributable to the acquisition of the items. Cost may also include transfers from equity of any gains/losses on qualifying cash flow hedges of foreign currency purchases of PPE.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the income statement during the financial period in which they are incurred.

The productive property is measured at fair value, which is determined by independent valuers, less subsequent accumulative depreciation and impairment losses. Property is adjusted at regular time periods so that the net book values do not differ from the fair values at the balance sheet closing dates.

Increases in the carrying amount arising on revaluation of land and buildings are credited to other reserves in shareholders' equity, except if it concerns reversal decline of the particular property that had been recognised in the expenses. In this case an equal part of the revaluation is recognised in the income.

Decreases in the carrying amount arising on revaluation are credited to expenses after firstly writing down any set up revaluation reserve for the particular asset.

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in the income statement. When revalued assets are sold, the amounts included in other reserves are transferred to retained earnings.

The assets residual values and useful lives are reviewed at each balance sheet date.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (Note 2.7).

Land is not depreciated. Depreciation on other assets is calculated using the straight-line method over their estimated useful lives, as follows:

Buildings	30-50	YEARS
Machinery	8-12	YEARS
Vehicles	4-6	YEARS
Furniture, fittings and equipment	4-5	YEARS

2.7 Borrowing costs

Borrowing costs directly related to the acquisition, construction or production of qualifying assets, the completion of which requires a significant period of time, is added to cost, up to the time that is required to prepare the asset for use or sale.

Income arising from temporary placement of capital borrowings intended for acquisition of the above qualifying assets is deducted from respective borrowing costs.

Other borrowing costs are recognised in the income statement in the year they incurred.

2.8 Intangible assets

(a) Computer software Acquired computer software and/or licences are measured at cost less amortisation. The amortisation is carried out on a straight-line basis over their estimated useful lives, which is 4 to 5 years.

Costs associated with developing or maintaining computer software programmes are recognised as an expense as incurred.

2.9 Impairment of assets excluding goodwill

Assets that are subject to amortisation are tested for impairment, whenever events or changes in circumstance indicate that the carrying amount may not be recoverable.

The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted using a pre-tax discount rate.

If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount.

An impairment loss is recognised as an expense in the year it arises, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but so that the increase carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years.

A reversal of an impairment loss is recognised as income immediately, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units).

2.10 Investments

a) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the Group provides money, goods or services directly to a debtor with no intention of trading the receivable.

b) Available-for-sale financial assets

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. They are included in non-current assets unless management intends to dispose of the investment within 12 months of the balance sheet date.

Purchases and sales of investments are recognised on trade-date the date on which the Group commits to purchase or sell the asset. Investments are initially recognised at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Investments are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the Group has transferred substantially all risks and rewards of ownership. Available-for-sale financial assets are measured at fair value and relative profit or loss are subsequently carried to shareholders' reserve until these assets are sold or impaired. On sale or when classified as impaired, the profit or loss is carried to the income statement.

The fair values of quoted investments are based on current bid prices. If the market for a financial asset is not active (and for unlisted securities), the Group establishes fair value by using valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are substantially the same, and discounted cash flow analysis refined to reflect the issuer's specific circumstances.

The borrowings and receivables and the investments held-to-maturity, are subsequently measured at amortised cost using the effective interest rate.

The Group assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired. In the case of equity securities classified as available for sale, a significant or prolonged decline in the fair value of the security below its cost is considered in determining whether the securities are impaired. If any such evidence exists for available-for-sale financial assets, the cumulative loss - measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in profit or loss - is removed from equity and recognised in the income statement. Impairment losses recognised in the income statement on equity instruments are not reversed through the income statement.

2.11 Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted average cost formula. The cost of finished goods and semi-finished inventories comprises the cost of raw materials, direct labour and general industrial costs. Borrowing costs are not included in cost of inventories. Net realisable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses.

2.12 Trade receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment. A provision for impairment of trade receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of the receivables. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the effective interest rate. The amount of the provision is recognised as an expense in the income statement.

2.13 Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months.

2.14 Share capital

The share capital includes the total share's par value. The amount of the share premium is classified in a special account and expenses for increase reduce the issue proceeds.

2.15 Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost using the effective interest rate. Owing to the relative stability of the interest rate of the functional currency but also the short-term-long-term character of the borrowings, the above nominal value is considered also as nominal value. The fair value of the liability portion of a convertible bond is determined using a market interest rate for an equivalent non-convertible bond. This amount is recorded as a liability on an amortised cost basis until extinguished on conversion or maturity of the bonds. The remainder of the proceeds is allocated to the conversion option. This is recognised and included in shareholders' equity, net of income tax effects.

2.16 Deferred income tax

Deferred income tax is determined using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts.

Deferred income tax is determined using tax rates that have been enacted by the balance sheet date.

Deferred income tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

2.17 Employee benefits

a) Short - term employee benefits

Short - term employee benefits towards the employees in money and in kind are recognised as an expense when accrued.

b) Pension obligations

The Group and company determine the future obligation for retirement based on actuarial calculations.

The liability recognised in the balance sheet in respect of defined pension plans is the present value of the defined benefit obligation less the fair value of plan assets, together with adjustments for unrecognised actuarial gains or losses and past service costs. The defined benefit obligation is calculated annually by independent actuaries using the project unit credit method. For anticipated time of payment it is used the discount rate of Greek Government Bonds.

Actuarial gains and losses arising from experience adjustments based on the historical data and are greater or lower of the margin 10% of the cumulative obligation, are recognised in the income statement over the employees' expected average remaining work lives. Past-Service costs are recognised immediately in income unless the changes to the pension plan are conditional of the employees remaining in service for a specified period of time. In this case, the past-service costs are recognised in the income statement on a straight-line basis over the vesting period.

2.18 Provisions

Provisions are recognised when:

- there is a present legal or constructive obligation as a result of past events,
- it is more likely than not that an outflow of resources will be required to settle the obligation and,
- the required amount has been reliably estimated.

2.19 Revenue recognition

Revenue is recognised at their value before value-added tax and other taxes, after discounts and rebates and after eliminating sales within the Group.

Revenue is recognised as follows:

a) Sales of goods

Sales of goods are recognised when a Group entity has delivered products to the customer, the customer has accepted the products and collectibility of the related receivables is reasonably assured. The sales are usually made on credit.

b) Sales of services

Sales of services are recognised in the accounting period in which the services are rendered, by reference to completion of the specific transaction assessed on the basis of the actual service provided as a proportion of the total services to be provided.

c) Interest income

Interest income is recognised on a time-proportion basis using the effective interest method.

d) Dividend income

Dividend income is recognised when the right to receive payment is established.

2.20 Leases

Leases where substantially all the risks and rewards of ownership are retained by the lessor are classified as operating leases.

Other leases are classified as finance leases.

Lessor

Cash receipts made under operating leases are charged to the income statement on a straight-line basis over the period of the lease.

Lessee

Lease payments based on operating leases are recognised in expenses on a straight-line basis over the period of the lease.

Assets leased out under finance leases are recognised as assets of the Group valued, at the lease's commencement, at fair value or provided it is lower of the present value of the minimum lease payments. The relative obligation to the lessor is recognised in the balance sheet as a receivable from finance lease. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance balance outstanding. The finance charge is recognised in expenses except if it directly relates to assets (see above).

2.21 Dividend distribution

Dividend distribution to the Company's shareholders is recognised as a liability in the Group's financial statements in the period in which the dividends are approved by the Company's shareholders.

2.22 Government grants

Government grants for training staff or other expenses are recognised in income based on the matching principle and disclosed in the income statement distinctively from the respective expenses. Government grants relating to assets are recognised in liabilities (current or non-current) as grants for PPE and are credited to the income statement according to the respective assets useful life.

3. Financial risk management

3.1 Financial risk factors

The Group's activities expose it to a variety of financial risks: market risk, credit risk etc.

a) Market risk

i) Foreign exchange risk

The Group operates mainly in Pan-European level as well as in countries in the Mediterranean. The transaction currency is usually € and therefore, significant risk from receivables do not arise. Contrary significant risks are possible to arise from the change of the foreign exchange rates of the currency for supply of raw materials (\$) and the selling currency of finished goods (€).

ii) Price risk

The Group is exposed to changes in the value of inventories since the basic raw materials it uses is a commodities exchange expressed in dollars and therefore besides the foreign exchange risk there is a price risk of the supply of raw materials. When there is a significant unbalance between raw material inventories and finished goods, the Group manages the aforesaid risk via purchase or sale options.

b) Credit risk

The Group has significant concentrations of credit risk as regards to the size and quality of credit risk. For this reason and depending on the category of products and the customer it secures the credit risk to internationally recognised insurance companies specializing as to this.

c) Liquidity risk

The liquidity risk continues to remain at relative increased levels due to the situation in the textile market as well as the significant decrease of the bank grants in the last years.

d) Cash flow and fair value interest rate risk

As the Group has no significant interest-bearing assets and therefore is independent of changes in market interest rates. The same applies for the long-term borrowings, which are considered as short-term borrowings.

Group policy is to contract and renew almost all of its total borrowings using the floating rate.

3.2 Fair value estimation

The fair value of financial instruments traded in active markets (stock exchange) is based on quoted market prices at the balance sheet date.

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The Group uses a variety of methods and makes assumptions that are based on market conditions existing at each balance sheet date.

The nominal value less estimated credit adjustments of trade receivables and payables are assumed to approximate their fair values.

4. Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

5. Geographical segments

The Group operates productively in Greece and the Balkan area. The Group's sales are mainly addressed to three geographical areas in Greece, in Other countries of the Eurozone and in Third World Countries. The total operations of the Company and Group concern production and trade of textile products and services (yarn, fabric, dyeing of fabric (facon) and ready garments.).

The Group's land and buildings were last revalued at 31 December 2004 by independent valuers (American Appraisal). Valuations were made on the basis of the fair value of the assets. The revaluation surplus net of applicable deferred income taxes was credited to other reserves in shareholders' equity (Note 19).

The depreciation for the period is analysed as follows:

ANALYSIS OF DEPRECIATION

(Amounts reported in thousands Euro)

	THE GROUP	
	30/09/2005	30/09/2004
Depreciation of cost of goods sold	7.596	10.498
Depreciation of selling and marketing costs	59	51
Depreciation of administrative expenses	920	801
Depreciation of other operating expenses	4.105	790
Total depreciation	12.680	12.141

In the table is included also depreciation relating to intangible assets (Note 8).

The acquisition cost of buildings and land, the valuation by the independent valuer, goodwill and the revaluation surplus are formed as follows:

REVALUATION SURPLUS FROM PROPERTY VALUATION

Less: Minority interest	-36	-192	-228
Revaluation surplus 30/9/2005	3.249	17.549	20.798

Bank borrowings are secured on land and buildings for the value of € 113.764 (2004:€ 98.764) (Note 22).

The office building of the company's registered office at Kifissou & 1 Konstantinoupoleos Str. Peristeri, is included in the above category of PPE and is held by the company through a finance lease agreement (sales & leaseback). Part of the above building is self-used and also subleased. Moreover, in the above PPE category is included the dyeing & finishing (property, machinery & equipment) of the subsidiary FANCO AE and a group of machinery of Rodopi Spinning Mills of the subsidiary of Rodopi Spinning Mills (Note 11), which are held also through a finance lease agreement.

The land and buildings were last revalued at 31 December 2004 by independent valuers (American Appraisal). Valuations were made on the basis of the fair value of the assets. The revaluation surplus net of applicable deferred income taxes was credited to other reserves in shareholders' equity (Note 19).

The depreciation for the period is analysed as follows:

ANALYSIS OF DEPRECIATION

(Amounts reported in thousands Euro)

	THE COMPANY	
	30/09/2005	30/09/2004
Depreciation of cost of goods sold	2.443	3.835
Depreciation of selling and marketing costs	0	0
Depreciation of administrative expenses	700	569
Depreciation of other operating expenses	2.460	631
Total depreciation	5.603	5.034

In the table is included also depreciation relating to intangible assets (Note 8).

The acquisition cost of buildings and land, the valuation by the independent valuer, goodwill and the revaluation surplus are formed as follows:

The companies LANCO AE and Riverwatch LTD subsidiaries of the subsidiary FANCO AE, participation value € 82 thousand (for which has been made a provision for impairment to 100% of the participation value) and € 11 thousand respectively, are found under liquidation and are not included in the consolidation.

18. Share capital

At 1/1/04 the company's share capital amounted to € 101.754.386,28 sub-divided into 20.030.391 ordinary registered shares of par value € 5,08 each.

At 29/12/2004 upon resolution of the 2nd Repeated Extraordinary General Meeting of Shareholders:

a. The par value of the shares was decreased from € 5,08 to € 5,05 and simultaneously increased the share capital of the Company, owing to merger through acquisition of the company OLYMPIC TEXTILES AE by application of the provisions of L. 2166/93 by € 441.000 and by € 168.113,72 by capitalisation of extraordinary reserves that is, totalling € 609.113,72. Thus, the share capital of the company following the acquisition was formed to € 102.363.500,00 sub-divided into 20.270.000 ordinary registered shares of par value € 5,05 each.

b. Decreased, by € 96.282.500 with set off of accumulated losses and proportional decrease of the share's par value from € 5,05 to € 0,30, without change of the number of shares.

Thus, the paid-up share capital of the company was formed at 31/12/04 to € 6.081.000,00 sub-divided into 20.270.000 ordinary registered shares of par value € 0,30 each.

The same above General Meeting resolved the increase of the Share Capital by € 15.202.500 and the issue of 50.675.000 new ordinary registered shares of par value € 0,30 and issue price € 0,30 in favour of the company's former shareholders. This increase was realised within the first Quarter of 2005 and was covered by € 11.034.082,50 through cash payments and by € 4.168.417,50 through capitalization of liabilities.

Thus, at 30 September 2005 the company's share capital amounted to € 21.283.500 sub-divided into 70.945.000 ordinary shares of par value € 0,30 each.

The amount of € 7.900.000 found in the Shareholders' equity items of the Group and the company at 31/12/04 concerns the prepayment against increase of share capital of the company as previously analysed.

Share options

The extraordinary General Meeting held on 24/7/2002 had set up a scheme for the distribution of shares to the members of the B. of D. and employees of the Company, as well as to its related parties, according to the provisions of article 13 par. 9 of c.L. 2190/20, amounting to right of option 3.204.860 shares from the total existing then 80.121.564 shares, that is 4%.

The right of option of the above shares foresaw exercise price the average price in July of each year and owing to the drop of the price of the share was not exercised.

Already, the General Meeting held on 29/12/04 resolved the modification of the scheme for distribution of shares to the members of the B. of D. and to the employees of the Company with exercise price the par value of the share plus 40%, that is, € 0,42, authorizing simultaneously the Company's Board of Directors to decide on the details of the scheme for percentage of issue of shares to 8% of share capital that is, to 5.675.600 shares (= 70.945.000 X 8%).

The Board of Directors up until today has not yet proceeded in the distribution of the above authorised share options.

19. Other reserves

a) Share premium

Concerns share premium of previous increases of the company's share capital as well as of the companies it acquired in the year 2001. In the current period the item of the share premium has decreased with the expenses of the recent increase of share capital of € 262 thousand.

b) Revaluation surplus

The amounts at 31/12/04 of the Group and the company concern the surplus that arose from the measurement (by an independent valuer) of the property, plant and equipment at fair value, in relation to the value recorded up until that date in the books of the Group companies. The increase of the amounts at 30/9/05 in relation to those at 31/12/04 is due to the decrease of the liability of the deferred taxation owing to the decrease of the tax rates from 35% to 32%.

c) Currency translation differences of subsidiaries

The amounts of the exchange differences concern the difference arising from the translation of the financial statements of the foreign companies, which are issued in the local currency, in €.

d) Reserves

Concern the ordinary, extraordinary and other tax-free reserves of the Group and of the company. The decrease of the items of the Group at 30/9/05 in relation to 31/12/04 by € 924 thousand is due to the non-consolidation of an operation (Note 17) and by € 20 thousand to settlement of accounts as set out in the statement of changes in equity.

20. Trade and other payables

The total of almost all liabilities towards trade payables is made with time delay. In the total amount are included also outstanding liabilities:

- Leasing contracts of € 3.940 thousand of the Group, for which has been submitted a request for arrangement.
- Other payables of € 528 thousand of the Company and € 963 thousand of the Group, the arrangement of which will be made with the re-establishment of the Group's liquidity.

21. Finance lease obligations

ANALYSIS OF FINANCE LEASE OBLIGATIONS

In the P.P.E. are included the following amounts, which the companies of the Group hold as lessees based on finance leases.

(Amounts reported in thousands Euro)

	THE GROUP		THE COMPANY	
	30/09/2005	31/12/2004	30/09/2005	31/12/2004
Cost-capitalised finance leases	60.878	60.878	30.351	30.351
Accumulated depreciation	(9.458)	(7.383)	(1.258)	(915)
Net carrying amount	51.420	53.495	29.093	29.436

Finance lease obligations

	THE GROUP		THE COMPANY	
	30/09/2005	31/12/2004	30/09/2005	31/12/2004
Non-current liabilities	35.390	39.630	26.158	27.471
Current liabilities	5.455	4.768	1.580	1.058
	40.845	44.398	27.738	28.529

Finance lease obligations – Minimum lease payments:

	THE GROUP		THE COMPANY	
	30/09/2005	31/12/2004	30/09/2005	31/12/2004
Not later than 1 year	6.303	6.288	1.810	1.811
Later than 1 year and not later than 5 years	17.670	18.221	9.050	7.240
Later than 5 years	25.962	30.139	24.234	27.401
	49.935	54.647	35.093	36.451
Future finance cost charges on finance leases	(9.090)	(10.249)	(7.355)	(7.922)
	40.845	44.398	27.738	28.529

The present value of finance lease obligations is as follows:

	THE GROUP		THE COMPANY	
	30/09/2005	31/12/2004	30/09/2005	31/12/2004
Not later than 1 year	4.954	4.768	1.079	1.058
Later than 1 year and not later than 5 years	13.473	14.247	5.852	4.525
Later than 5 years	22.419	25.383	20.807	22.946
	40.845	44.398	27.738	28.529

Finance Lease obligations are effectively secured as the rights to the leased asset revert to the lessor in the event of default.

	1.659	728	0	0
TOTAL SHORT-TERM BORROWINGS	90.443	106.498	48.527	58.388
GRAND TOTAL BORROWINGS	120.475	118.558	69.881	59.741

In the short-term borrowings of the company from the National Bank of Greece is included also an overdraft account of € 800 thousand (31/12/04 € 3.061 thousand) which stands as a ceiling to insured grants (registration of mortgage € 3.182 thousand).

In the operating records at 30/9/05 is not included borrowings, which were not consolidated in the nine-month period, to the contrary of the year 2004, where it had been consolidated and its borrowings at 31/12/04 amounted to € 5.692 thousand.

From the total above borrowings, borrowings of the Group at 30/9/05 of € 118.356 thousand and of the company € 68.626 thousand are secured by the land and buildings of the Group (Note 6), with pledge on shares of subsidiaries (Note 7), with transfer of clientele cheques (Note 12), with blocked deposits (Note 13), with pledge on inventories (Note 14) and with pledge on listed securities (Note 15).

During the last three years the banks limited considerably the bank borrowings towards the company and the Group, which consisted mainly to renewed short-term grants, in effect of which in July – August 2004 to arise a significant lack of working capital. The Group companies, had already within the year 2003, pointed out to the banks that the aforesaid tactic would create liquidity problems. Finally, after significant delays at 9/12/04 was signed a contract for a debenture loan, which among other things forecasted an issue of a debenture loan of € 20.000.000 and its cover from the main credit banks. From the amount of the debenture loan € 9.000.000 concerned refinancing of existing borrowing and € 11.000.000 new liquidity. The cover of the borrowing was realized within the first quarter of 2005, its duration is five-years with right of renegotiation from the banks and its interest rate is equal to EURIBOR six months plus 2,25 percentage units. At the same time it was decided the retaining of the size of the borrowing at the levels at 30 June 2004 and for a period of up to 18 months

from the first issue of the debenture loan (February 2005). The interest rate of almost all borrowings is determined based on the EURIBOR 3 to 6 months plus 1,50 – 3,00 percentage units. The par value of the borrowings due to stability of the interest rates and their short-term character is deemed also fair.

The Extraordinary General Meeting held on 29/12/04 among other things resolved the issue of a convertible bond to ordinary registered shares up to the amount of € 5.000.000. The duration of the borrowing will be three – years. The conversion price will be equal to the par value of the share (€ 0,30). The bonds will not have coupons, the yield on maturity will be zero and the exercise of the conversion right of the bonds to shares, will coincide with every monthly anniversary of the issue date. The Board of directors of the company has not yet activated the start of the issue and distribution of the aforesaid debenture loan.

23. Provisions for retirement benefits

The Group and the company based on actuarial calculations determined a future liability for retirement benefits. Further to the retirement benefit, based on the provided for by law, the company and Group have no other obligation for any other benefit against the employees.

24. Deferred tax assets and liabilities

ANALYSIS OF DEFERRED TAX ASSETS & LIABILITIES (Amounts reported in thousands Euro)

	THE GROUP		THE COMPANY	
	30/09/2005	31/12/2004	30/09/2005	31/12/2004
Deferred tax assets from:				
Provisions for impairment of inventories	160	1.064	0	105

Surplus	12.104	13.239	7.116	7.783
Depreciation differences	993	1.925	390	338
From recognition of finance leases (leasing)	2.879	2.866	0	0
Total	15.977	18.031	7.506	8.121

In the operating records at 30/9/05 are not included deferred operating taxes, which were not consolidated in the nine-month period, to the contrary of the year 2004, where it had been consolidated and its deferred tax liabilities at 31/12/04 amounted to € 1.150 thousand, while its deferred tax assets at 31/12/04 amounted to € 22 thousand.

25. Grants for property, plant and equipment

Concern the company and its subsidiaries and are related to investments realised from 1995 up till today. The percentage of the grant depends on the area and the development law that have been enacted from 20% to 55%. According to the development law and the approved decisions there are various liabilities as well as time limitations regarding the transfer of the granted assets, the change of legal form and the shareholders (only of the unlisted companies).

The aforesaid grants are transferred to the income statement on the proportion of the depreciation of the assets that have been granted. In the current liabilities is included the proportional grants that will be transferred to the income statement during one year (from 1/10/05 and onwards), to the income statement. Respectively, in the non-current liabilities is included the amount that concerns the grants that will be transferred to the income statement in the following years, after one year.

26. Deferred income

Concerns the balance of profit arising from the sale of the building that houses the registered offices of the company and in continuity its leasing (sales & lease back) on 28 February 2003. The aforesaid profit is transferred to the income statement proportionally during the lease agreement, which expires on 28 February 2020.

37. Contingencies

The Group has contingent liabilities in respect of banks, other guarantees and other matters arising in the ordinary course of business. It is not anticipated that any other material differentiations will arise from the contingent liabilities. The company and Group have given guarantees to third parties and in favour of their subsidiaries and third parties, for securing mainly bank liabilities. In particular the company has given company guarantees and guarantee letters of € 61.740 thousand. Respectively on a Group level have been given guarantees and guarantees letters of € 67.260 thousand.

37. Events after the balance sheet date

Within the frame of the agreement of the Group with the main credit banks for the renegotiation of the bank borrowings and the financing of the companies have been engaged external consultants, in collaboration with which the Group prepares and will submit a five-year business plan for the viability of the companies of the Group.

The aforesaid business plan foresees among other things the reorganisation of the operating activities and especially the productive installations, decrease of staff and financing of the working capital and the restructuring cost. The approval and financing of the five-year business plan, which has been submitted jointly with the other textile companies of the Group, will give the company the opportunity to face the liquidity problems for the realisation of the required actions for the reconstruction and reorganisation. In a contrary case the company will face problems as to whether it will continue its operation at its present status.

Following the acceptance and its approval from the banks, the reconstruction cost will have to be recognised in the income statement and the net equity of the companies, as well as the effect on the awaited operating cash flows.

For the reorganisation of the activities of the subsidiary companies in the Balkan area, the operation of the factory of the company ALFAN was suspended. Moreover the productive operation ceased of the weaving mill at Petria Pellas. At 31/10/2005 was signed an agreement for the extension of the finance leasing of the registered office building, on the basis of which the monthly rent is decreased from € 150 thousand to € 97 thousand for the first 11 months and then is increased gradually. The duration of the lease is extended from 28/02/2020 to 31/10/2022 and the repurchase right from € 9.000 thousand to € 7.242 thousand.
